

I am a sales rep and travel by car. I need the services XM Radio provides since the weather gets life threatening in the mid west states in the winter and tornado season. We could be as up to date on cell phones as the UK, but you people bring too much poilitics(BIG BUSINESS)into the mix. More and more, the little people paying the majority of the taxes that pay all of the governmental salaries are left with the short end of the stick. This country prospers by new business ideas & I say we let the networks figure out how to compete. I CHOOSE to pay for XM, just as I choose to pay for cable TV. What is the difference? REJECT NAB's petition 04-160!!!!
